

Benefits

- Entry level Legato model
- Accurate flow delivery
- High precision fluid dosing
- Use any manufacturer syringe
- Constant and variable flow rates
- User selectable volume delivery

Features

- Accuracy $\pm 0.5\%$
- Holds one syringe from 0.5 μl to 60 ml
- High resolution color touch screen
- Unparallel ease of use
- Password protection for program configuration
- Run LED light on front panel
- Stable flow design
- Built in syringe table
- Up to 30 lbs (13.6 kg) linear force
- Built in RS-485 interface to link multiple pumps
- USB port
- Footswitch Interface
- Protection with a spill dam
- CE, UL, CSA, CB Scheme, EU RoHS

Applications

- Electrospraying
- Microfluidics
- Drug Discovery
- Nanofluidics
- Flow Cytometry
- Mass Spec
- Organic Synthesis
- Stereotaxic Injections

Markets

- Pharmaceutical
- Biotech
- Chemical
- Neuroscience
- Research and Development
- Government
- Petrochemical
- Food and Beverage

KDS Legato™ 100

Infuse Only Syringe Pump

The NEW entry level Legato 100 is ideal for electrospraying, mass spec calibration and other applications where a single syringe is used

The KDS Legato 100 Single Syringe infuse only is the world's first single syringe infusion only pump with a touch screen interface. The Legato 100 has a wide flow rate range from 1.26 $\mu\text{l}/\text{min}$ to 88.32 ml/min depending on syringe size. The large touch screen color display allows the user to see all of the pump's operating parameters to ensure proper operation during the experiments. Syringe size and flow rate are easily displayed as well as the volume delivered and the elapsed time. Set up is easy using the icon driven software.

The Legato 100 is an infuse only syringe pump. It accommodates a single syringe from 0.5 μl to 60 ml. Any type of syringe can be used in the unit including glass, plastic or stainless steel. The syringes are held in place by KD Scientific's new clamping mechanism designed to hold syringes securely in place. The run screen has all of the pump parameters, as well as, the pump's running conditions. The basic pump offers the same easy to use touch screen configuration and "run" screen as the more advanced Legato 200. An led light on the front panel makes it easy to see if the pump is running. Syringe size and flow rates are easily displayed as well as the volume delivered and the elapsed time.

The pumps are versatile and multiple pumps can be connected through the RS485 interface. Advanced micro stepping techniques are employed to further reduce the step angle to eliminate flow pulsation. The accuracy is $\pm 0.5\%$. A wide dynamic flow range from pico liters per minute to milliliters per minute can be programmed into the pump. Add the New Adagio software to maximize the use of the pump's functions and features. Adagio allows you to configure the pump through the software as well as operate one or multiple pumps. In addition the National Instruments labview drivers are available on their website.

KD Scientific pumps are acknowledged as the industry's highest value solution for delivering precise and smooth flow. KD Scientific is recognized worldwide for quality and reliability at an economical price and has the broadest line of syringe pumps to meet your specific application. KD Scientific is committed to delivering the highest level of customer satisfaction, as well as technical support for all their products.

NOTE: KD Scientific syringe pumps are for laboratory use only.

Intuitive Run Screen

Combining multiple parameters simultaneously with internationally recognizable icons allow the Legato™ Series to provide a new level of intuitive syringe pump operation.

Specifications

Model	KDS Legato 100
Syringe Size	0.5 µl to 60 ml
Power	100-240 VAC: 50/60 Hz, 50 W, 0.5 A fuse
Motor Drive Control	Microprocessor with 1/16 microstepping
Linear Force (Maximum)	13.6 kg (30 lbs) @ 100% Force Selection
Number of Microsteps per One Revolution of Lead Screw	15,360
Step rate (Minimum)	27.5 sec/µstep
Step rate (Maximum)	26 µsec/µstep
Drive Motor	0.9 degree Stepper Motor
Pusher Travel Rate - (Minimum)	0.15 µm/min
Pusher Travel Rate - (Maximum)	159 mm/min
Flow Rate (Minimum)	1.26 pL/min (0.5 µl syringe)
Flow Rate (Maximum)	88.32 mL/min (60 ml syringe)
Dimensions	22.6 x 19.05 x 15 cm (9 x 7.5 x 5 in)
Weight	2.66 kg (5.9 lbs)
Connectors	RS485 - IEEE-1394 6 pos, USB - Type B
