

Cole-Parmer®

Cole-Parmer® Electric Bunsen Mantle - BB-200 & CN-200 Analogue Controller

- Conical shaped heating element directs radiant
- Top cowl deflects heat away from your hand
- Air circulation from the vented housing keeps the base cool enough to hold during operation
- Burner consumes only 400W of power
- Recommended controller is the CN-200

Bunsen Burner BB-200

Analogue Controller CN-200

Bunsen Burner BB-200

Cole-Parmer® Electric Bunsen Mantle - BB-200 & CN-200 Analogue Controller

Cole-Parmer® Electric Bunsen BB-200, combines the advantages of a regular gas burner with the clean, easy operation of our Electromantles. It is corrosion-resistant and has a cool-to-the-touch base.

Radiation from the heater is directed upwards to a focal point. The Electric Bunsen is ideal for heating test tubes, crucibles, small flasks and beakers, regardless of their shape.

CN-200 Analogue Controller

The CN-200 analogue controller has been designed to provide a comprehensive answer to control the heating of resistive loads such as Electric Bunsens, Electromantles, Heating Tapes and Cords for bench top operation delivering up to a maximum of 800 Watts. A rod support clamp is provided at the rear of the controller to take a standard 12.5mm diameter rod.

An accessory extension mains lead is available where remote operation is required e.g. in a fume extraction unit.

Technical Specification

Specification	BB-200
Flask capacity	25ml
Material	Stainless-steel
Max temperature range	800°C to 1000°C
Shipping weight, kg	0.5
Dimensions (d x h), mm	120 x177
