

Blue Leather Cryogenic Gloves

Our blue leather gloves are available in both wrist and mid arm lengths. These two products are manufactured in a water-repellent leather, with ISO AIR felt and wool / cotton fleece lining.

These products have a highly efficient Porelle microporous membrane, which offers waterproof protection, but is also breathable.

Protection offered is down to -197° C.

Extra safety features have been added into the design of these Cryogenic blue leather gloves, as follows.

An additional safety feature is offered in the form of an adjustable strap on the cuff of the longer length gloves, to ensure complete protection against liquid nitrogen vapours. The full cuff length is 15 cm.

The wrist gloves have an added leather vein patch on the inner side of the knitted wrist cuff, giving added protection against cold environments.

Cryogenic Blue Leather Wrist Glove, Usage down to -197° C
