

SWISS MADE
SWISS TECHNOLOGY

SERIES 530, 365, 330
MOISTURE ANALYZERS

PRECISA DNA: ZERO COMPROMISE

Laboratory and industrial technicians are aware of the significance of the results they provide. That is why they are unwilling to accept any compromise in their field of work. This is precisely why leading specialists around the world place their trust in Precisa and have done for decades.

PRECISA DNA: MOISTURE ANALYZER

Moisture Analyzers from Precisa - for efficient measurements and accurate results. As the leading manufacturer of thermogravimetric analytical equipment, Precisa excels with an extensive range of moisture analysis equipment, meeting highest demands in research, production and quality control.

PRECISA DNA: SWISS PRECISION

Precisa products are prime examples of Swiss perfection and reliability. They are tried and tested in both demanding laboratory environments and industrial applications, and are subject to rigorous quality controls throughout the entire manufacturing process. Precisa invests continuously in developing new technologies and employs a highly qualified team. The result is a state-of-the-art range of precision instruments for the most exacting demands.

HIGH PERFORMANCE

Moisture and water content have a defining influence on the quality and processing of materials, as well as on the price of raw materials and finished products in many industries including food, animal feeds, chemical and pharmaceutical products, construction materials etc.

The use of compact and robust precision moisture measuring instruments in the laboratory and in production increases efficiency and saves time and costs. Furthermore, productivity is enhanced by the fully automatic moisture analysis of samples, and the corresponding generation of measurement documentation. All models of the Series 530 PBM, 365 EM and 330 XM provide fast, error-free moisture analysis, using highest degrees of measurement performance and precision.

Simple to use and service-friendly to maintain, the Series 530 PBM, 365 EM and 330 XM are the results of Swiss precision in engineering and production, which guarantees reliability, robustness and an extensive life of error-free operation at highest levels of precision.

SERIES 365

With model EM 120-HR, Precisa is setting new standards in the demanding area of high-end moisture analyzers.

The flagship model combines ease-of-use and sophisticated customizing features for advanced and demanding applications.

EM120-HR is an innovative, high-tech moisture analyzer which includes the latest technical developments. This flagship model contains unique performance features and a modern user- interface all within a compact form with a small footprint. Those users who will not accept any compromise in their working environment may enjoy the reassuring certainty that for many years they can rely on an extremely accurate instrument which features the latest technology and renowned Swiss quality.

SERIES 530

Based on the 520 Series balances, our newest moisture analyzer range features the weighing technology PHASTbloc™ (Precisa Hybrid Advanced Sensor Technology) at its core. Developed using the latest simulation technologies high performance is being achieved to further expand the abilities of analyses.

SERIES 530 PBM

Automated lid opening

Status indicator light;
green, ready to use,
red, analysis running

Thermodynamic software simulation of air-flow

Hand disassemble of heating chamber for easy cleaning

NEW FEATURES

Automated Lid Opening

The 530 Series features an automated lid opening function which can be activated. After the sample run or at a selectable cool-down temperature, the lid will open automatically, for fast cooling down. This shortens and streamlines the process and frees resources of the users.

Status Indication

The 530 Series comes with an LED status indicator. This helps the user to determine the status of the device regarding analysis and temperatures.

Green: Ready to use

Red: Analysis running

Red flashing: Device still hot

Increased Performance

Using the latest state-of-the-art thermodynamic simulation software, our in-house R&D team created an end product with increased performance through reduction of air lifting effects. This allows the 530 series to analyze all samples with the highest precision and accuracy, even samples which contain a very low moisture content (e.g. polymers).

Easy Cleaning

The flat and obstacle free surface of the 530 Series allows for a thorough and quick cleaning finish.

All the parts at the bottom of the heating chamber can be disassembled and re-assembled by hand, without the use of any tools. Cleaning of the parts removed can be done manually or with help of a dishwasher or ultrasonic cleaner.

Unique PHASTbloc™ Technology

The heart of the 530 Series is the PHASTbloc™, the only hybrid weighing cell available on the market. PHASTbloc™ combines all of the benefits of a monolithic and conventional EMFC cell to ensure high performance and easy repairability.

The PHASTbloc™ hybrid weighing cell

SERIES 530 PBM

530 PBM Moisture Analyzer

Choice of Radiation Heat Source

Large and Clear Backlit LCD Display

PRECISA PBM 60 / 60HR

Readability 0.001 % / 0.01 %

High-end instruments for customers with a limited number of methods. These moisture analyzers are robust, provide a high degree of precision and are simple to operate.

Based on the latest 520 balance Series featuring the PHASTbloc™ technology the 530 Series is ideal for critical sample material e.g. with very low moisture content.

- Sturdy construction, perfect for laboratory and production environments
- Weighing range 124 g
- Readability up to 0.1mg / 0.001%
- High temperature range up to 230°C
- Temperature step of 1°C
- High-contrast LC display with backlight
- Memory storage of up to 30 methods
- USB type A (host), USB type B (device), RS232
- Choice of radiation heat source: halogen, infrared or infrared dark radiator
- Selectable heating modes: standard, boost, smooth

Simple, Fast and Accurate

- Variety of start-up or end-point control selections for optimum control
- Language independent prompts operated by symbol keys
- Easy access sample holder

Quality Assurance

- Results printed in GLP guideline format
- Numerical and statistical analysis available
- Real-time results shown in display
- Special version without glass for food industry

SERIES 365

Compact and Modern Design

Choice of Radiation Heat Source

Graphic Display for Easy Guidance and Real Time Results.

PRECISA EM 120-HR

Readability 0.001 % / 0.01 %

The EM 120-HR instrument for fast and accurate moisture analysis with a wide range of methods; sophisticated and simple to operate, complying to the most stringent standards.

Highly Precise Technology

- Weighing range 124 g
- Adjustable readability: 0.1 mg / 0.001 % and 1 mg / 0.01 %
- High temperature range up to 230°C
- Automatic self calibration system (SCS)
- Bright graphic display
- Extended memory capacity, 100 methods
- Choice of radiation heat source: halogen, infrared, infrared dark radiator
- USB and RS232 interfaces as standard
- Selectable heating modes: standard, boost, smooth

Intuitive User Interface

- Freely programmable display
- Graphic presentation of the analysis
- Choice of auto stop criteria settings

Quality Assurance

- Compliance with GLP and GMP
- Numerical and statistical analysis available
- Real-time observation of analysis

Versatile Connectivity

Advanced slide-in module technology: USB Host, Ethernet wired, Ethernet wireless, Bluetooth and others.

SERIES 330

Robust and Simple to Operate

Easy Sample Access

Menu-driven, Screen-guided Applications

PRECISA XM 66 / XM 50

Readability 0.01 %

High-end units for customers with limited number of methods. These instruments are robust, provide a high degree of precision and are simple to operate.

The Versatile All-Round Moisture Determination Solution

- Sturdy construction, perfect for all laboratory and production environments
- Weighing range up to 310 g
- Readability up to 1 mg / 0.001%
- High temperature range up to 230°C
- Temperature step of 1°C
- High contrast, bright vacuum fluorescent display
- Memory storage of up to 30 methods
- Interface RS232
- Choice of radiation heat source: halogen, infrared, infrared dark radiator
- Selectable heating modes: standard, boost, smooth

Simple, Fast and Accurate

- Variety of start-up and end-point control selections for optimum control
- Language independent prompts operated by symbol keys
- Easy access sample holder

Quality Assurance

- Results printed in GLP guideline format
- Numerical and statistical analysis available
- Real-time results shown in display
- Special version without glass for the food industry
- XM 66 with increased weighing range of 310 g and special software for the rapid moisture results for sewage and waste water treatment plants
- XM50 the all-rounder for low weight samples and single method use
