

SWISS MADE  
SWISS TECHNOLOGY

**prepASH<sup>®</sup>**  
THERMOGRAVIMETRIC ANALYSER

## PRECISA DNA: ZERO COMPROMISE

Laboratory and industrial technicians are aware of the significance of the results they provide. That is why they are unwilling to accept any compromise in their field of work. This is precisely why leading specialists around the world place their trust in Precisa and have done for decades.

## PRECISA DNA: SERIES 340

Over 40 years of experience made it possible to provide reliable weighing data during drying and ashing. The inbuilt analytical balance enables automatic end point detection and weight control during the whole analysis.

## PRECISA DNA: SWISS PRECISION

Precisa products are prime examples of Swiss perfection and reliability. They are tried and tested in both demanding laboratory environments and industrial applications, and are subject to rigorous quality controls throughout the entire manufacturing process. Precisa invests continuously in developing new technologies and employs a highly qualified team. The result is a state-of-the-art range of precision instruments for the most exacting demands.

## FULLY AUTOMATED

The equipment works completely autonomously once it is loaded and started. This offers the user a completely new time management option as the analysis can be run at different time periods which could not previously be used (e.g. at night).

By the permanent recording of the measurements during the entire process and the automatic storage of the final results, results are available at any time.

## INTUITIVE TOUCH SCREEN CONTROL

prepASH® features a high resolution colour touch screen (VGA 5.7") which is simple and easy to use thanks to the language-independent icons. The sample chamber is opened and closed automatically by touching the icon on the screen.

## DRY WEIGHT AND ASH

One of the most important parameters in analytical testing of many materials and substances is the determination of dry weight and ash. This is often time-consuming and has a high error potential when performed in the classic way with drying/muffle oven and precision balance.

## EFFICIENT DAILY ANALYSIS

prepASH® with its easy operation is a fully automatic analysis system for thermogravimetric determination of dry weight and ash. The prepASH® intelligently unites the functions of a drying oven, muffle oven, analytical balance and evaluation unit into one system.

# HEATING & CAPACITY

TEMPERATURES OF UP TO 1000°C

25ML PORCELAIN GLAZED CRUCIBLE

12 SAMPLE PLATE

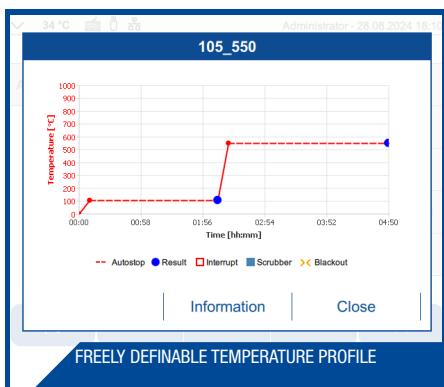

QUARTZ GLASS THERMAL PROTECTION

40ML PORCELAIN GLAZED CRUCIBLE

19 SAMPLE PLATE

FREELY DEFINABLE TEMPERATURE PROFILE

50ML PORCELAIN GLAZED CRUCIBLE

29 SAMPLE PLATE

## From 12 to 29 Samples in One Run

High efficiency through the simultaneous analysis of moisture, ash and volatiles of up to 29 samples in one run. Optional additional sample plates are available.

## Analysis Operating at Temperatures of up to 1000°C

Powerful heating element ensures fast and homogenous temperature distribution within a wide temperature range of 50°C to 1000°C.

## Quartz Glass Protection

The heating element is protected with quartz glass providing excellent thermal shock resistance.

## Temperature Profile

The temperature profile is freely definable with ramping and holding temperatures enabling moisture, volatile and ashing with one single weighing. Temperatures can be set between 50°C to 1000°C. Combustion atmosphere can be varied by choosing the process gas (air, O<sub>2</sub>, N<sub>2</sub>).

## Adapt to the Needs of the Sample

- Work with crucibles which fit best the application.
- Work with your own special crucibles in the adapters of the 12 sample plate.

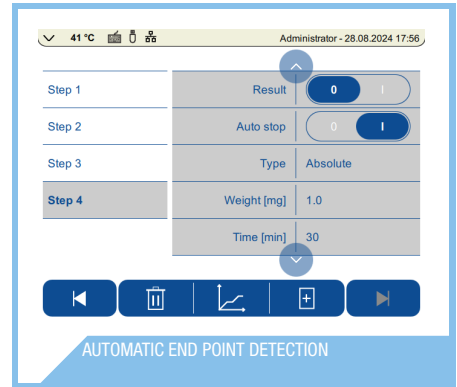

# BALANCE & WEIGHING

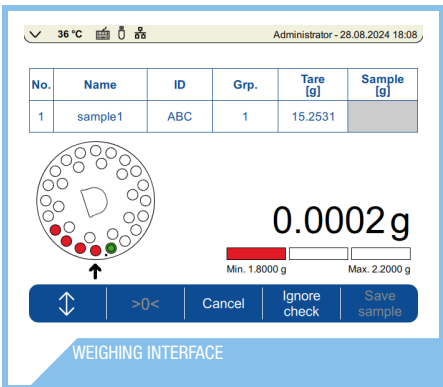

PRECISA ANALYTICAL BALANCE

DIRECT WEIGHING

AUTOMATIC END POINT DETECTION

WEIGHING INTERFACE

WEIGHT OVER TIME SAMPLE DATA

## Precisa Analytical Balance

With built-in high performance, Precisa's analytical balance with its unique housing, provides direct weighing at 0.1 mg resolution, eliminating the need for an additional balance.

## Continuous Control of the Analytical Cycle

Weighing curves are recorded over time for each individual test sample. This permits automatic end point determination and control during the entirety of the drying and ashing process. No additional computer is needed.

## Automatic End Point Detection

The analysis is finished when all samples have reached a stable weight. The auto-stop criteria can be chosen from 0.1-100 mg per 10 min, 30 min or 60 min. Alternatively the analysis can be stopped at a fixed time.

# CONNECTIVITY & OUTPUT

 **Precisa**

## Standalone Device

Standalone, but well connected. The high-resolution graphics touch screen (colour, VGA 5.7") is simple to use and features language-independent user guidance using the Precisa icon concept. Functions and applications approved for the specific user can be started by one click. Process sequence with all parameters shown on the colour screen. No additional computer required. Printscreens can be created by users e.g. for reporting or quick manual creation.

## Connectivity Options

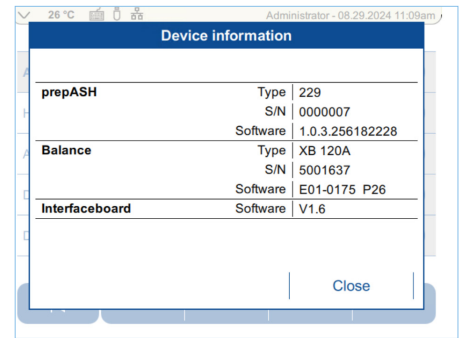

Connect to/with: PC (ethernet or direct), Keyboards, Barcode reader, USB-sticks, Printer.

## Transfer Data

All measurement data is stored on the device and can be reproduced by means of USB stick or via network to the PC and transferred into LIMS. All the data is encrypted to ensure data integrity.

PC software prepDATA for extended data evaluation (e.g. search function, free result calculation, etc.), online monitoring, statistic including search functionality, and report preparation. Modular report concept makes it easy to customize the layout (customized logo, header, and analysis data inclusion).

# QUALITY & CONTROL

## Quality Management Protocol

All three prepASH® 340 Series models work autonomously as stand-alone-units and offer full control and documentation. They display the weight loss of each individual sample during the program steps and display these on the colour touch screen display.

Beyond that all models can be connected through ethernet interface to the network and be remotely monitored by means of prepDATA software on the PC. With this connection it is possible to monitor multiple prepASH devices at the same time.

The results are calculated as losses or residuals in respect of weighing-in or pre-interval values (e.g. dry mass). The user may choose between %, ‰, g/kg, g.

## Compliant with ALCOA+ / CFR 21 Part 11

- Data integrity for data storage, import and export (AES-128 db encryption)
- User authentication through state of the art password management
- Electronic records
- Access control per user
- Time stamping
- Detailed and searchable recording of actions and tasks in the audit trail

# OPTIONS & SPECIAL APPLICATIONS

Scrubber

## Sulfated Ash

A scrubber may be connected for sulfated ash application. Sulfuric acid fuming step can be done automatically in prepASH®.

Coal/Coke Interface

## Coal/Coke Applications

Determine moisture, volatiles, fixed coal and ash in one analysis. There is a predefined, calibrated method for the coal/coke in which you can easily adapt parameters. Work with our special crucibles with lids.

# MODELS

Model	Capacity	Readability	Repeatability	Temperature Range	Crucibles	Response Time	Item No.
prepASH® 2.0 229	120 g	0.1 mg / 0.01 ‰	1 g / 0.2 ‰ 10 g / 0.02 ‰	50 - 1 000°C	29 pcs. / 25 ml	4 s	340-9220-003
